PROFESSIONAL SUMMARY

MCA student (Cloud & DevOps Specialization) at PES University with demonstrated expertise in building and deploying production-grade full-stack applications. Proven track record of delivering complete MERN stack projects from concept to production deployment on Vercel. Strong foundation in system design principles, cloud infrastructure, and modern development practices.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Design, Component Architecture
Backend: Node.js, Express.js, RESTful API Design, Authentication & Authorization
Database: MongoDB (Schema Design, Aggregation), SQL Fundamentals
Tools & Development: Git, GitHub, VS Code, Postman, Command Line, NPM
Cloud & Deployment: Vercel (Frontend Deployment), AWS Fundamentals (EC2, S3), Linux Basics

PROJECTS - LIVE DEPLOYMENTS

TaskFlow - Full-Stack Task Management Application (MERN Stack)

Live Demo: <https://task-flow-project-mocha.vercel.app/>

- Architected and developed complete full-stack task management application using React, Node.js, Express.js, and MongoDB
- Implemented secure user authentication system with JWT tokens, ensuring secure session management and token validation
- Designed and built RESTful APIs following best practices with proper request validation, error handling, and status codes
- Created well-structured MongoDB database schema with proper relationships and indexing for optimal query performance
- Developed responsive user interface using React and Bootstrap, ensuring seamless experience across mobile, tablet, and desktop devices
- Successfully deployed frontend on Vercel with production-grade configuration, enabling continuous updates and reliability

Personal Portfolio Website - Project Showcase & Professional Online Presence

Live: <https://rishulohar-portfolio.vercel.app/>

- Designed and developed professional portfolio website showcasing technical expertise and completed projects
- Implemented fully responsive design utilizing modern CSS techniques for optimal viewing across all devices and screen sizes
- Integrated clickable project links with live demo URLs and GitHub repositories for easy code review and project exploration
- Deployed on Vercel ensuring high availability, fast load times, and continuous deployment pipeline

EDUCATION

Master of Computer Applications (Cloud & DevOps Specialization)

PES University, Bengaluru | 3rd Semester (Final Year)

Bachelor of Science in Computer Science & Technology

DAVV (Devi Ahilya Vishwavidyalaya), Indore | CGPA: 6.85

CONTINUOUS LEARNING & SKILL DEVELOPMENT

- System Design Fundamentals: API design patterns, database optimization, caching strategies, and scalability principles
- AWS Cloud Services: EC2, S3, RDS, Load Balancing, and Route 53 for building scalable cloud infrastructure

- DevOps Practices: Docker containerization, GitHub Actions CI/CD pipelines for automated testing and deployment
- Testing Frameworks: Jest for unit testing, Supertest for API integration testing, and quality assurance practices
- Competitive Programming: LeetCode problem-solving to strengthen algorithmic thinking and coding efficiency

CORE COMPETENCIES

End-to-End Full-Stack Development • Production Deployment & DevOps • Problem-Solving & Algorithmic Thinking • Self-Motivated Continuous Learner • Clean Code & Best Practices • Responsive Design Implementation • RESTful API Architecture • Database Design & Optimization
